

2011-2016 SAD #4 Strategic Plan Task Force

A Task Force is currently being formed from a cross section of community members for the purpose of creating a new five-year strategic plan for the district. This plan will provide a “road map” to guide decisions that the district must make in the future. The group will consist of members of the Board of Directors, teachers representing various levels, members of the community, students and parents. District administrators will participate in an advisory role as well.

The Task Force will be developing goals in at least five areas:

Curriculum, Instruction, and Technology

Community Involvement

Staff Development

Administration and Financial Operation

Facilities and Support Services

The Task Force will schedule information gathering sessions in the fall of '09 with various stakeholders within the district including:

Faculty
Students
Parents
Community Members
Administrators
Support Staff
Board of Directors

The Task Force will gather input from these forums and then cull and synthesize the information into achievable objectives. Ideas not supported by a majority of the Task Force will not be listed as objectives. Each objective will be categorized by level of need and cost. The information will be published and will serve as a guideline for all decisions made regarding the operation of the school district in the coming years. Anyone wishing to serve on the task force should contact the Superintendent's Office at 876-3444 or e-mail pstearns@sad4.com.

All Task Force information will be posted on the district website located at: sad4.com
